

## HTML PAGE STRUCTURE – YANEZ' PORTFOLIO

Every HTML page in this website follows the same semantic structure.

1.

The header contains the site identity and navigation. It appears the same on every page.

Inside the header:

- Site title (Yanez' Portfolio)

- Navigation menu (links to Home, About, Education, Skills, Work Experience, Volunteer, Projects, Assets, Contact)

2.

The navigation element lives inside the header.

It provides links to all main pages so users can move around the site easily.

3.

The main section contains the unique content for each page.

This is the only part of the page that changes from page to page.

Examples of content inside main:

- About page text
- Education history
- Skills lists
- Work experience entries
- Projects descriptions
- Contact information or forms

4.

The footer appears at the bottom of every page.

It contains secondary information.

Inside the footer:

- Copyright notice
- Your name or portfolio name

- Optional links such as GitHub or LinkedIn

Summary:

Header and Footer stay the same across the site.

Main changes depending on the page.

This structure ensures clean, accessible, and professional HTML.
